Art Unit: 1653

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. Claims 1-5, 10, 16, and 20, drawn to DNA encoding SYNIP polypeptide and diagnostic assays, classified in class 536, subclass 23.1.
- II. Claims 6 and 7, drawn to SYNIP polypeptide, classified in class 530, subclass 350.
- III. Claims 8 and 9, drawn to antibody against SYNIP polypeptide, classified in class 530, subclass 387.1.
- IV. Claim 11, drawn to diagnostic assay using RNA, classified in class 435, subclass 6.
- V. Claims 12, drawn to diagnostic assay using SYNIP, classified in class 435, subclass 7.1.
- VI. Claims 13, drawn to diagnostic assay using SYNIP, classified in class 435, subclass 7.1.
- VII. Claims 13, drawn to diagnostic assay using cDNA encoding SYNIP, classified in class 435, subclass 7.1.

Claim 13 is drawn to the use of two wholly different compounds, protein and DNA. Therefore, two separate methods are set forth in Claim 13 because an assay using protein and an assay using DNA comprises different steps and outcomes. Therefore, if either of Inventions Vi or VII is elected. Claim 13 will be examined only in-so-far as it pertains to the elected invention.

- VIII. Claims 14, 15, and 17, drawn to a method of isolating RNA, classified in class 435, subclass 69.1.

Art Unit: 1653

- IX. Claims 18 and 19, drawn to a method of treating or preventing insulin resistance – gene therapy, classified in class 514, subclass 44.

The inventions listed as Groups I-IX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The DNA of Invention I is not novel as shown in the art set forth in the PCT examination. Therefore, the DNA of Invention I lacks a special technical feature.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
